Ahmed Fadl Ahmed AbdoRabo

Frontend Developer

Email: af38765220@gmail.com | Phone: +20 105 007 5993 | GitHub: github.com/ahmedfadl156

Professional Summary

Dedicated Frontend Developer with over 3 years of self-taught and project-based experience, specializing in designing responsive, user-centric web applications. Proficient in HTML, CSS, JavaScript, and modern frameworks, with significant progress in mastering React and prior expertise in Angular. Experienced in real-time and API-driven applications using Node.js and WebSocket. Skilled in collaborative development, leveraging strong problem-solving and communication abilities through academic and independent projects. Committed to delivering high-quality UI/UX solutions and adhering to software engineering best practices.

Skills

- **Technical Skills**: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, React (significant progress), Angular (prior experience), Node.js, WebSocket (ws), Express.js, MySQL, Git, GitHub, Chart.js, TheMealDB API, OMDB API
- **Soft Skills**: Teamwork, Problem Solving, Effective Communication

Education

Bachelor of Science in Computer Science
New Mansoura University, Expected June 2027
Cumulative Grade: Very Good

Projects

Cinema Scoop: Movie Search App (Independent Project, 2025)

- Developed a responsive movie search and watchlist web application using React, Tailwind CSS, and JavaScript, integrating the OMDB API for real-time movie data retrieval.
- Implemented features like search functionality, detailed movie views, and watchlist management using React state and hooks, ensuring a seamless UI across devices.
- Deployed on Vercel, demonstrating modern frontend workflows and clean code practices. (github.com/ahmedfadl156/Cinema-Scoop)

ChatFree: Real-Time Chat Application (Independent Project, 2025)

- Engineered a real-time chat web application using HTML, Tailwind CSS, Vanilla JavaScript, Node.js, and WebSocket (ws library), enabling instant messaging for multiple users.
- Implemented user identification, dynamic avatars, persistent usernames via localStorage, and an auto-scrolling chat area, with deployment on GitHub Pages and Railway.app.
- Ensured responsive design and clean code practices via GitHub. (github.com/ahmedfadl156/Real-Time-Chat-App)

Chef's Pal Website (Independent Project, 2025)

- Built a responsive recipe discovery web application using HTML, Tailwind CSS, and Vanilla JavaScript, integrating TheMealDB API for recipe search and random recipe display.
- Implemented favorites management with localStorage and detailed recipe modals, achieving a 90+ Lighthouse score for accessibility and performance.
- Managed version control via GitHub. (github.com/ahmedfadl156/Chefpal$_w ebsite$)

Budget Planner App (Independent Project, 2025)

- Created a financial tracking web application using HTML, Tailwind CSS, Vanilla JavaScript, and Chart.js to visualize income and expense data in real-time.
- Designed features for adding/deleting transactions and persistent storage via localStorage, ensuring seamless functionality across devices.
- Hosted source code on GitHub. (github.com/ahmedfadl156/Finance$_T racker_A pp$)

Courses & Training

DEPI Initiative, Egypt (2024–2025)

- Completed intensive training in Angular, frontend development fundamentals, and Node.js, mastering responsive design and RESTful API integration.
- Built a full-stack e-commerce project as a graduation requirement, focusing on modular code and UI/UX optimization.

Languages

- Arabic: Native
- English: Proficient in technical communication and documentation

Interests

- Web design and UI/UX optimization
- Developing innovative side projects with React and real-time technologies
- Exploring emerging web frameworks and APIs
